Education

2022 - present

Master of Science Degree

- Software engineering for data science

king mongkut's university of technology
thonburi

2013 - 2016

Bachelor of Engineering Degree

- Mechanical Engineering

Chiang Mai university

Skills

- Programming Languages**
Java, html, javascript, css, react, mysql
- Frameworks and Tools**
Spring Boot, IntelliJ, VS code, Postman
PgAdmin
- Java Skills**
Core Java Concepts , JDBC, JPA , ORM
- Engineering Skills**
Designing product, Product Development
Project Management , Quality Problem Tool

Language

English Pre-intermediate

Nuttapat Pothavichai

Full Stack Java Developer

Dedicated and highly motivated Bachelor of Mechanical Engineering graduate with a strong passion for technology and a desire to transition into the software development field as a Java Full Stack Engineer. While my academic background is in mechanical engineering, I have taken proactive steps to acquire relevant skills and knowledge in software development. I am committed to leveraging my problem-solving abilities, analytical mindset, and a willingness to learn to contribute effectively to software projects.

Experience

Feb 23 - Aug 23

WeStride I Full-Stack Development Bootcamp

Full-Stack Developer

- Web development fundamentals including HTML, CSS, and JavaScript at WeStride Full-Stack Development Bootcamp
- Developed interactive and responsive user interfaces employing React.js, focusing on state management and the latest front-end practices
- Gained proficiency in back-end technologies, utilizing Node.js and Express to construct robust server-side applications with API and database integration
- Enhanced problem-solving and algorithmic thinking by studying and implementing various data structures and algorithms in software solutions
- Demonstrated comprehensive full-stack development skills by conceptualizing and executing a capstone project, synthesizing front-end and back-end technologies into a cohesive application

Jan 19 - Mar 23

mitsubishi motors thailand co. ltd I Lamechabang sriracha chonburi

Mechanical Design Engineer

- Developed new products and ensured all tasks were executed as planned
- Generate new ideas for cost reduction by knowledge/engineering skill
- To solve quality issue in market claim by using engineering knowledge and quality tools (DRBFM, KT PA)

Projects

User Management System

Developed a User Management System in Java using Spring Boot for the backend, React for the front-end, and PostgreSQL for database management. The system features a full suite of user functionalities including add, view, edit, delete, and search capabilities, all styled with custom CSS for a responsive design

Technology Stack Java , Spring boot, React , PostgreSQL

EXE SPORT Shopping online

Developed an e-commerce sports shoe store featuring a self-created API and data management with MongoDB. The site offers a wide selection of shoes with dynamic, multi-page functionality including product categorization, brand-specific listings, and search capabilities with sex and price filters. Integrated a complete user experience with account registration, shopping cart and a secure checkout process powered by Stripe for payment handling

Technology Stack React , JavaScript , CSS , MongoDB , Express , Restful API
